Principais componentes na ordenação de anúncios: um experimento em ambiente real de publicidade computacional

André Casimiro

Data Engineering problem solver

São Bernardo do Campo, São Paulo, Brazil

Summary

I am challenge-motivated, a creative problem solver, and a self-learner. I enjoy teamwork and collaborative environments, but I am also comfortable working independently for long periods when needed. My leadership style is easygoing and supportive, and I am strongly driven by science, data analysis, and the practical use of data to solve real-world problems. I hold an MSc in Data Science applied to Digital Advertising Systems and an undergraduate degree in Computer Science. My professional background includes 4 years in web development, 12 years of experience in data engineering and related areas, and 4 years of leadership experience.

Experience

Safari AI

Senior Software/Data Engineer

August 2022 - May 2026 (3 years 10 months)

Achievements:

- Built Safari composable core processing engine using Flink (computer vision data into business metrics)
- Built pipeline deployment control plane using Kubernetes
- Enabled real-time latency for customers
- Enabled company first scaling round from some to hundreds of pipelines
- Helped sales team with customer demos

Personal achievement: reverted to full time technical role successfully!

Responsibilities:

- Transform computer vision data into business metrics in real time
- Architect and develop data processing engine
- Lead PoCs, RFCs and surveys to align team on technical decisions
- Technical leadership of more junior team members

Languages: Java, Python, Shell, SQL

Data stores: Pulsar, InfluxDB, Postgres, MariaDB, Kafka, Prometheus
Technologies: Flink, Kubernetes, Terraform, FastAPI, Grafana, S3, ECS, EKS, CDK

BairesDev

Head of Data Engineering

July 2021 - June 2022 (1 year)

Remote

Achievements:

- Built a world-class data platform

Responsibilities:

- Define data engineering strategy
- Organize prospect master data for 300M+ records
- Build and hire the team
- Technical leadership

Org Size: from 10 to 35 people

Technologies: Databricks, Snowflake, Astronomer, Atlan, Dbt, Great Expectations, Tableau, Kafka

Creditas

Data Engineering Manager

August 2018 - July 2021 (3 years)

São Paulo

Achievements:

- Scaled data engineering area to multiple teams as the company exponentially grew
- Delivered machine learning platform to operate ML models
- Delivered multiple datasets for analytics
- Data platform bot to enable software engineers autonomy

Responsibilities:

- Define strategy for data engineering area
- Strong technical collaboration on design and conception of data lake, data platform and machine learning platform
- Hiring
- Create and evolve both internal and external processes
- 1:1s with team members and other leaders
- Coach and train new leaderships

Org size: from 5 to 30 people

Technologies: Redshift, DMS, Python, Airflow, Kafka, AVRO, Docker, MLFlow.

FIAP

Big Data MBA Professor

September 2017 - September 2018 (1 year 1 month)

São Paulo, São Paulo

Taught classes on Massive Parallel Programming, Data Ingestion and NoSQL Databases.

Itaú Unibanco

Software/Data Engineer

August 2016 - July 2018 (2 years)

São Paulo

Responsibilities:

- Massive data offload from mainframe to reduce costs (mips)
- Building big data application to provide unified place for customer data
- Performance testing
- Technical leadership and peer development
- Building continuous deployment pipeline

Technologies: Cassandra, Kafka, Java, Spring Boot, NodeJS, Puppet, Gradle, Jenkins, Jenkinsfile, Artifactory

UOL - Universo Online

2 years 10 months

Data Engineer

December 2015 - August 2016 (9 months)

Building large data infrastructure and processing system for real time bidding application, playing role both as data engineer and data scientist. Solving three main problems: store data for auditing, big data analytics reports for ad campaigns and machine learning bidder intelligence.

- Installed and managed hadoop cluster
- Log aggregation application using spark streaming
- Streaming large event log through kafka cluster (20k events/sec)
- Keeping up with academic research on real time bidding

Technologies: Cloudera Manager, Kafka, Spark, Spark Streaming, Flume, Hue, Hive, Zookeeper, Amazon AWS.

Data Engineer/Analyst

February 2015 - December 2015 (11 months)

Developed several data related demands on digital advertising:

- Traffic trends analysis
- Modeling and implementation of online experiments (A/B tests)
- Dashboards for KPI tracking
- Published an article on ad ranking factors (in conjunction with masters thesis)
- Modeled data user-tracking collect structure for web analytics
- Look-alike ad campaign serving using IR token match
- Collaborative filtering recommender for advertising campaigns

Docker, Spark, Hadoop, Flume, Cloudera Impala, HIVE, Oozie, Omniture (Adobe Analytics), Highcharts.js, SQL, ETL, Cassandra, splunk, Solr, Python, Fabric.

System Analyst

November 2013 - January 2015 (1 year 3 months)

Worked with different advertising systems, developing for both front and back-end.

- Javascript development
- Java development
- Worked with data driven mindset from lean startup

Technologies: Java, Javascript, TDD, Junit, Cucumber, Facebook API, Hadoop, Omniture (Adobe Analytics), Excel.

REDS III

Database Developer

March 2013 - November 2013 (9 months)

Data management and processing for blood donation research:

- Advanced SQL query support for data mining
- Dataset integration
- Pentaho OLAP system implantation
- ETL development

Technologies: SQL, Pentaho suite, SQL Server 2000, Python

IT3S

Python web developer

February 2011 - February 2013 (2 years 1 month)

IT3S was a 3rd sector tech startup working on collaborative mapping.

- Developed web applications using several technologies of Python stack
- Product features design and development
- Conception and development of data import platform using Google products

API

- Unified login
- Automated web application deploy

Technologies: Django, Flask, Backbone, RequireJS, Coffeescript, Less, Google {OAuth, Maps, Drive, Spreadsheet, Fusion Tables} API, Facebook OAuth API.

Drclas - Harvard University

Intern

February 2009 - January 2011 (2 years)

- Internal CRM system development (PHP & MySQL)
- Visual data import system development
- Travelled to Chile to train team on using the CRM
- Enhanced English conversation skills

Technologies: PHP, MySQL, Linux.

Education

Universidade de São Paulo

Master's degree, Computer Science · (2013 - 2016)

USP - Universidade de São Paulo

Bachelor's of Science, Computer Science · (2008 - 2012)
